PROFILE

I'm a web developer with experience in front-end development who can create responsive websites and online applications that work effectively on a variety of devices. I have a solid understanding of HTML5, CSS3, and JavaScript, as well as expertise using the newest cutting-edge development tools and techniques. These skills enable me to manage independent projects on my own and work collaboratively as a member of a successful team.

EXPERIENCE

<u>Web Developer</u> at HD software, Gujarat

JOB Responsibility

- Optimizing the user experience
- Developing and maintaining the user interface
- I'm currently working on a hospital management project where I am developing web pages for hospital employees and patients' appointment booking webpages according to matching doctors' profiles.
- I work mainly on client-side scripting to make websites functional on multiple devices and browsers.
- I also meet with clients to know more about their needs and get a visual representation of what they want to build.

PROJECTS

Predator 700

HTML, CSS

➔ This is a PURE website only using **vanilla HTML and CSS** codes.
➔ The website comprises six **HTML pages** home, product, catalog, comparison, photos, and contact us.
➔ All pages have their own **CSS styles** file where I have used **animation, gird, keyframes, box, transform**, etc.
➔ I have also included **Google Map API** in the contact-us pages.
➔ *Source Code*

Nike Store

HTML5, CSS3, JavaScript

➔ This is a Nike sneakers footwear store website where end-user can purchase their products.
➔ It features five different brands (AirForce, Jordan, Blazer, Crater, and Hippie) options to choose from, which also come with images of each footwear.
➔ *Source Code*

FilmLane

HTML5, CSS3, JavaScript

➔ Filmlane is a fully responsive movie website page, Responsive for all devices, built using HTML, CSS, and JavaScript.
➔ *Source Code*

Daily Morning News

React.JS

➔ This one-page application gives users access to several different categories of the top headline news in the country. Along with many other features, the program supported both desktop and mobile versions and had an infinite scroll bar.
➔ *Source Code*
